

1864

1863-1865

The term causalgia (Greek: kausis - [burning](#), algos - [pain](#)) was introduced by [Silas Weir Mitchell](#) in [1864](#). It was used to describe a rare [syndrome](#) that followed a minority of partial peripheral nerve injuries in the American civil war. Triad: burning pain, [autonomic dysfunction](#) and trophic changes.

[Lasègue's sign](#) was named after [Charles Lasègue](#) (1816-1883).

In [1864](#) Lasègue described the signs of developing low back pain while straightening the knee when the leg has already been lifted. In [1880](#) Serbian doctor Laza Lazarević described the straight leg raise test as it is used today, so the sign is often named Lazarević's sign in Serbia and some other countries.

(Hughlings) Jackson's syndrome: CN X, XI & XII palsy First described in [1864](#) with unilateral paralysis of the soft palate, larynx, sternocleidomastoid, trapezius, and tongue.
