

Parkinsonism

Parkinsonism is a clinical [syndrome](#) characterized by [tremor](#), [bradykinesia](#), [rigidity](#), and [postural instability](#).

Etiology

It is found in Parkinson's disease (PD)—after which it is named—dementia with Lewy bodies (DLB), and Parkinson's disease dementia (PDD), and many other conditions. A wide range of causes may lead to this set of symptoms, including neurodegenerative conditions, drugs, toxins, metabolic diseases, and neurological conditions other than PD.

see [Parkinson's disease](#)

see [Secondary parkinsonism](#).
